# TABLE TOP

A coffee table with a glass top is a stylish and popular choice for residential and commercial spaces. It's known for its sleek and modern appearance. The transparency of the glass can make the table appear less visually imposing, which can be especially beneficial in smaller spaces or rooms with much furniture. Because of their transparency, glass top coffee tables can create a sense of openness and lightness in a room. They allow light to pass through, which can help brighten up the space and make it feel more spacious.

## Glass Specification

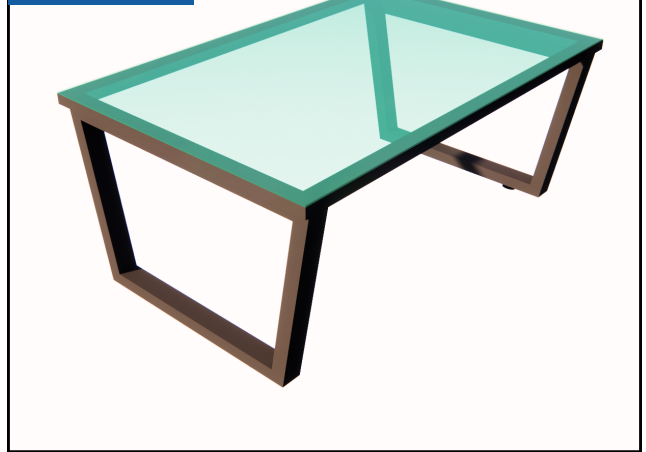

Type	Coffee Table / Center Table
Material Type	Toughened Glass

Room Type	Living Room / Family Living
Shape	Rectangle

# Table Models

Model 1

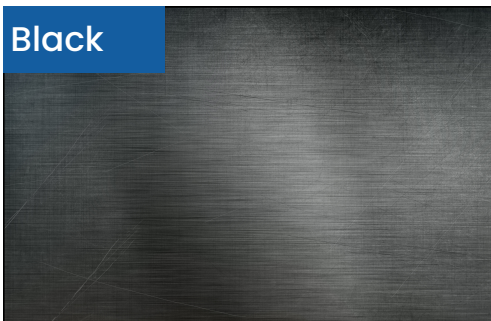

Model 2

A rectangular-base metal coffee table with a glass top is a contemporary and elegant piece of furniture that blends the strength of metal structures with the elegance of glass. Base Structure adds solidity and sturdiness to the coffee table. The glass top provides a sense of sophistication and transparency to the coffee table. Tempered glass provides increased durability and safety. Tempered glass is also more resistant to scratches and heat than ordinary glass, making it ideal for both indoor and outdoor applications.

## Available finishes for Stand
